

STAFF REASONS & REWARDS

6 GREAT REASONS AND REWARDS WHY IT JUST MAKES SENSE TO WORK FOR SSG...

1 GETTING PAID:

Great news, all staff get paid (with exception to those volunteering). Rates vary depending on roles and responsibilities as you move through the company.

2 TRAINING & DEVELOPMENT:

As you would expect, we invest heavily in our staff training and development. We have a multi-dimensional approach to achieving the most knowledgeable and competent team we can. This includes internal and external workshops and support strategies. Whatever you join us with, we guarantee you will gain much more.

3 TEAM, COMMUNITY, FRIENDSHIPS:

You will be joining a team of like-minded people who work closely together to achieve our objectives. We have multiple teams across the business, collectively forming our staff community, which involves wider opportunities and events. Our working teams often transcend the work place, forming meaningful friendships leading to non-work related social events and activities.

4 VARIETY:

SSG offer a wide range of services to a large spectrum of people, which means the variety you will experience within your role could be vast. As we always say, 'no two days are ever the same'.

5 PRAISE & AWARDS:

Credit where credit is due. While we expect the highest standards and best efforts from everyone all of the time, it doesn't stop us appreciating and rewarding it. As a business, we organise and host numerous staff-focused events and special theme days. We openly recognise staff doing well in their professional development and reward people when they achieve targets set. Our big annual Staff Awards recognise members of the team who are excelling. But most importantly of all, we say 'thank you' as much as we can.

6 INTERNAL PROGRESSION:

Where possible, we strive for internal progression over external recruitment. As an employer who invests in their workforce, we look to prioritise opportunities for progression to our existing team members as part of our core strategy for identifying talent.
